# WORKFLOWS QUICKLY AND EASILY FROM YOUR MOBILE DEVICES

## MOBILE WORKFLOWS – SECURE, USER-FRIENDLY AND IN REAL TIME

Efficient mobile working means being able to carry out processes no matter which device you're using. But many desktop applications are still not fully optimized for mobile use and are not really suitable for tablets or smartphones.

Processes that could actually be optimized are held up, wasting valuable time.

**EBF Forms** works with SharePoint to enable you to access and use your work processes quickly and easily from your mobile devices. With EBF Forms, you can generate forms on a portal, and then access them via an app. The data is then automatically transferred to SharePoint lists, where it can be managed.

## WIDE RANGE OF POSSIBLE USES

### VACATION PLANNING

Submit vacation requests

### INVENTORY

Fill out inventory documents

### SURVEYS

Start internal surveys to gather feedback from your colleagues

### MEDICAL INSURANCE CERTIFICATES

Upload medical insurance certificates

### EXPENSES CLAIMS

Upload expenses claims

### COMPANY CARS

Submit invoices for repairs and fuel costs

## YOUR BENEFITS AT A GLANCE

Forms for SharePoint can be easily created by drag & drop and be reduced to the bare minimum for ease of use. Everything you need is the EBF Forms app and a SharePoint server.

### TIME AND COST SAVINGS

Fast implementation, optimized work processes and savings of additional license costs.

### IMPRESSIVELY EASY TO USE

Forms can be created using drag and drop. The app is very easy to use from mobile devices.

### HIGH LEVEL OF DATA PROTECTION

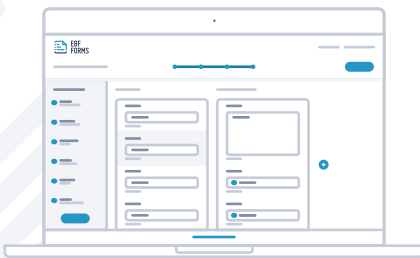

Data encryption via German servers.

### STRUCTURED INFORMATION RETRIEVAL

Data is displayed in a uniform way and can be easily processed.

## LEAN PROCESS

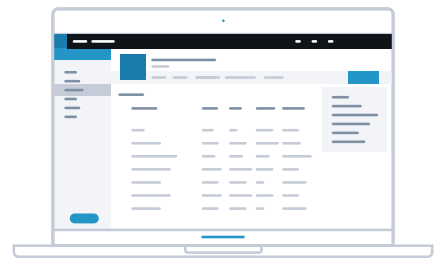

01

Forms can be easily created in the backend using drag & drop.

02

Users open the EBF Forms app, fill out the form and submit it.

03

The data is automatically sent to SharePoint lists, where it can be processed accordingly
