

Comfortable and safe

# PRINTING FROM YOUR MOBILE DEVICE

**EBF Print** is an ideal complement to the AirPrint solution on iOS devices and “Follow-Me” solutions, enabling users to send documents to the company’s printing infrastructure anytime, anywhere from any AirPrint-supporting app via a mobile device.

The „Follow-Me“ solution caches the print job on the print server and keeps it ready for printing. Thus, printing is just as secure, resource-saving and simple as printing via a stationary client.

## SECURE MOBILE PRINTING

The transmission of the print data is encrypted, and users must authenticate themselves at the device before printing.

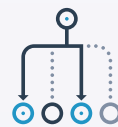

## COMFORTABLE USE

No app or software needs to be installed.

## CENTRAL ADMINISTRATION

The setup and administration takes place centrally. The user does not have to become active. You determine who can use which printer.

## MANUFACTURER-INDEPENDENCE

EBF Print is available for all common printer manufacturers.
