

OPTIMIZED ADMINISTRATION OF MOBILEIRON

MOBILEIRON MULTI-CLIENT CAPABILITY

You use the Unified Endpoint Management System MobileIron and have to manage different company, department and role assignments?

Administration tasks for managing mobile devices can be comfortably distributed to several administrators with different roles and rights with the EBF Delegated Admin and managed by a superior administrator. Here it can be defined which devices an administrator can view, which ones he can access and to what extent he is allowed to perform actions.

TRANSPARENT ADMINISTRATION OF LARGE USER GROUPS

The EBF Delegated Admin makes it much easier to manage large user groups and assign roles and rights to administrators.

SIMPLE INTEGRATION

The EBF Delegated Admin can be easily integrated into existing IT infrastructures. A connection to common interfaces is supported.

RELIEF OF THE IT DEPARTMENT

By splitting the administration tasks, individual administrators are relieved and time is saved.

CLEARLY ARRANGED STRUCTURE

The organization and its sub-areas are structured in a dedicated way and large user groups are comfortably managed.

FUNCTIONAL DIVERSITY

Multiple administrators can take over device, content and app management for assigned devices.
