

IN TOUCH WITH ALL INTERNAL CONTACTS

EBF CONTACTS — THE MOBILE CORPORATE ADDRESS BOOK FOR IOS

The EBF Contacts app makes it easier to reach colleagues on iOS devices. The solution gets contacts from Exchange Online and On-Premise, uses encryption to save them on the cellphone and synchronizes these on a regular basis. The app thereby enables the relevant information about colleagues to be displayed, making it possible to identify internal callers. Because the name of the caller is displayed for incoming calls from contacts within your own organization even without having to save these as contacts first.

USE CASES FOR EBF CONTACTS

DISPLAYING CONTACT DATA

All contacts from the corporate address book can be displayed with details such as name, profile picture, telephone number, e-mail address, position, department and line manager and can be called or contacted from this view by SMS or e-mail.

SEARCHING FOR CONTACTS

You can use name, company name, e-mail address or telephone number to search for colleagues. If it is not possible to reach the colleague in question, displaying the relevant line manager also provides a further potential contact person.

DISPLAYING INTERNAL CALLERS

The name of the caller is displayed for incoming calls from contacts within your own organization – without having to save these as contacts first.

SECURE PROTECTION FOR SENSITIVE CONTACT DATA

EBF Contacts ensures clear separation of personal and business contacts with secure, encrypted storage of corporate contacts on the smartphone – secured with password, face ID or touch ID.

BENEFITS OF EBF CONTACTS

EBF Contacts offers great added value for both users and administrators. The app makes manual maintenance of company contacts redundant and is easy to implement.

EASY IMPLEMENTATION

EBF Contacts connects with an Exchange O365 or Exchange On-Premise Server (2016 or above). No integration in infrastructure is required.

UEM INTEGRATION

No great effort is required to distribute EBF Contacts including AppConfig using a Unified Endpoint Management system.

HIGH USER COMFORT

Manual maintenance of contact data becomes redundant. Data is also available offline.

HIGH LEVEL OF DATA PROTECTION

Personal and business contacts are clearly separated.

AVAILABLE FOR iOS

EBF Contacts is available for iOS (from iOS 13) and can be downloaded from the public App Store or provided in your Enterprise App Store.
